Applications
· Agriculture
· Yardwork
· Gardening
· Construction
· Oil & Gas
· Maintenance
· Material Handling
· Outdoor Winter Work

- COLD PROTECTION: These cold-resistant gloves feature a Thinsulate insulation lining to keep hands warm in temperatures down to -30°C / -22°F.
- WATER RESISTANT: Our work gloves are made with soft leather that has been treated to resist water and liquids.
- KNIT CUFFS: These gloves feature knit cuffs for easy use with jackets and to help seal in heat while keeping harsh environmental elements out.
- KEYSTONE THUMB DESIGN: Our soft leather safety gloves feature a keystone thumb design, improving both

durability and dexterity.

- APPLICATIONS: These working gloves are ideal for work in agriculture, construction, material handling, gardening, yardwork & debris removal, oil & gas refinery, and maintenance, and outdoor winter work.

- Flexible to use.
Waterproof

Proof

Winter Working Gloves

Winter Work Gloves
- Thermal insulated cotton.
- Provides warmth and comfort.

- **Warm & Windproof** The inside of cold weather work gloves use thermal cotton provides superior warmth and comfort in winter, which creates a barrier that blocks ice, moisture and wind. Wearing for a long time, you will not feel muggy and heavy.
- **Waterproof in Winter** The leather itself is truly waterproof, unlike other leather waterproof winter work gloves which just use coating on surface. Keep your hands dry and not afraid of getting wet when you are working in winter. Note that if you soak in water for a long time, the surface will get wet, but your hands will not get wet. Even so, we don’t recommend soaking it in water for a long time.
- **Greatly Skin-friendly** These winter works gloves for men made of high quality material cowhide with thickness 1.35mm, which is not only naturally soft but also durable and abrasion-resistant. Extremely strong and comfortable are one of the biggest features of these thermal insulated work gloves, which makes them feel like your second hands.
- **Knit Cuff & Gunn Cut** Keystone thumb design make these waterproof warm work gloves easily hold working tools and provide greater flexibility because the fingers are sewing with the palm independently. The knit cuff prevent dust and debris from entering in order to keep your hands clean.

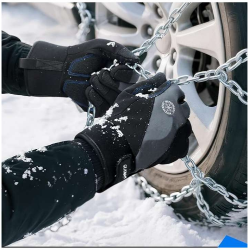
GLAMOURA

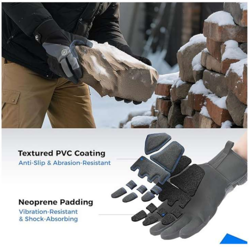
Leather Winter Gloves

3M Insulated Winter Gloves with Abrasion-Resistant Palm,

Purpose of Product

- Cold-Proof, 100% Waterproof Warmth: A waterproof membrane and water-repellent shell lock out ice and slush, while Thinsulate 100g delivers lightweight insulation without bulk. Comfort-rated to -4°F, these insulated work gloves perform in loading bays, cold storage, construction sites, snow shoveling, and outdoor winter work.





Textured PVC Coating
Anti-Slip & Abrasion-Resistant
Neoprene Padding
Vibration-Resistant
& Shock-Absorbing

Product Description

• Dual-Layer Durability, Secure Grip: These thermal work gloves combine a cold-stable nitrile gel palm pad that absorbs vibration with abrasion-resistant PVC overlays for long-lasting wear.	• Nimble Precision, Touchscreen Ready: Natural-flex segmented fingers keep tasks precise, and touchscreen thumb/index lets you check routes or make calls without removing them.	• Extended Cuff Coverage: Longer cuffs than standard work gloves provide better protection against snow and wind. They are easy to slip on and off while keeping warmth locked in—ideal men's winter work gloves for farming, ice fishing, and all-day outdoor work.
